

PRODUCT DATA SHEET

STAINLESS STEEL CABLE TIES

DESCRIPTION

The self-locking head design speeds up installation and the cable tie along the body at any length provides locking. It provides a strong and durable cable connection method.

It can be used in a wide range of indoor and outdoor application areas.

With its smooth surface and rounded ends, it guarantees the protection of the cable and the safety of the working person.

It provides the highest level of support for network cables.

FEATURES

- Material : 304 Stainless Steel
- Water Absorption: None
- Flame Retardancy : UL94V-2

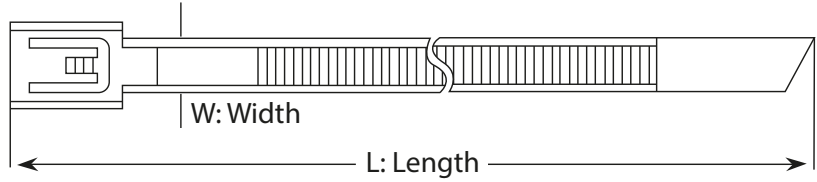

MARKINGS

- It complies with RoHS standards.
- It complies with ISO 9001 standards.
- It complies with UL standards.
- It complies with CE standards.
