

PRODUCT DATA SHEET

SKP STANDARD TYPE CABLE LUG

DESCRIPTION

A cable lug is attached to an electrical device such as a wire or cable and then securely fastened to its end using a crimp tool and crimp die.

FEATURES

- Made of copper material in accordance with EN/13600 standards.
- Annealed copper pipes are used during production.
- Copper with 99.9% conductivity is used in production.
- 100% Tin coating is made in the range of 5-8 Microns.

MARKINGS

- It complies with CE standards.
- It complies with RoHS standards.
- It complies with ISO 9001 standards.
- It complies with IEC standards.
- It complies with TSE standards.
- Domestic Production.
