## BIMETAL (AL-CU) CABLE LUG

### DESCRIPTION

Bimetal cable lugs are a type of cable lug used to connect aluminum conductors to copper terminals of power cables and electrical equipment in distribution equipment. The aluminum and copper used are electrolytic and the conductivity is very good.

### FEATURES

Material :	99.9% Aluminium and Copper
Tensile Degree :	110MPa
Operating Temperature :	- 40 ° C --- +100 ° C

### MARKINGS

- It complies with CE standards.
- It complies with RoHS standards.
- It complies with ISO 9001 standards.
- It complies with IEC standards.
